

Forex Traders: Do Not Read This Letter Unless You Have a Minimum Of \$5,000 in Your Forex Brokerage Account!!

Amazing Secret Weapon Hoarded By International Banks, Hedge Fund Traders, And Wealthy Private Forex Traders, Skyrockets Your Profits, Transforms Your Trading Strategy, Eliminates Fear of Making the Wrong Trading Decision ... And Commands Instant Respect From Your Forex Broker.

“One trade after reading through your material and a private session with you – and the course has paid for itself. One trade! A million thanks!” :-) ~ Cliff C.

If you’ve ever dreamed of a ***super-effective Forex Trading Strategy***, where you’ll be able to *read* the foreign currency markets with the *precision of a laser*, then this will be *the ammunition you need*.

My name is **Tom “Strignano” Alongi** and I’m a professional Foreign Exchange Currency Trader, with over 20 years trading for International Banks.

For years ***I was a Chief Dealer*** in charge of several large trading rooms in New York. I’m now a senior trader for a Private Hedge Fund with my old colleagues, and I coach professional Forex traders for \$2,000 an hour.

Here’s What It’s All About

In a few short minutes I’ll show you how to *slash years* off the learning curve, so you can *ignite your Forex Trading profits*.

But it's crucial you understand a few things ...

First off ... you can hunt down this trading information and *decipher it on your own* ... maybe. There are many so-called Forex “gurus” out there pitching their courses, “Forex Trading for Dummies”, and a few excellent out-of-print books (if you can find them).

Out of despair you may have tried "automated" trading systems, and "robots" – only to discover they are lousy, cheap tactics tapping into your desperation for push button, fast cash.

Now you've got a dwindling trading account with the heart pounding panic ... you'll have to put up the family home as collateral to cover the sucking sound as your Forex Broker vacuums funds out of your trading account to cover your losses.

This wasn't how it was supposed to be.

Let's get past the mumbo-jumbo and cut straight to the chase ... it's time you started paying attention to an actual *Insider* of the Forex trading world ...

“I've learned a few surgical, precise strategies. I applied it the next day on my real Forex account, and guess what? I had several winners. Tom knows everything about Forex.” ~ Paul D.

It's time for some ...

Insider Information.

Knowledge that only an elite few have been made aware of. But now ...

It's time we “*crack the code*” - empower the "little" guy *to experience some real wealth.*

I'm about to **expose** the very *same, tried & proven systems used by World Banks and Hedge Funds* who funnel billions upon billions of dollars into their pockets each and every day.

This insider information will be released to you for the very first time and all you have to do is take advantage of my easy, step-by-step blueprint.

We need to clear up something though ...

I need to be sure you're convinced beyond the shadow of a doubt - are you reeling in all the cash you can possibly handle trading in Forex?

Are you absolutely confident you can play with the Big Bank and Hedge Fund Traders ... pick up on every little nuance or tiny tremor in a delicately balanced market?

These guys are rolling in the moolah, and taking their wife to Paris every year.

Are you?

And another thing ...

You think you're Forex Broker is going to help you make the right trading decisions? In your wildest dreams do you actually think he'll stop you from making *stupid, spur-of-the-moment panic trades*?

Even if he did know, he wouldn't tell you. Know this: Forex brokers don't know *anything* about how to make money in the Forex markets. If they did, they wouldn't be brokers. They'd *be traders!* Forex brokers are not experts in foreign exchange ...

They Are Salesmen!

Listen, if you're prepared to see through the blanket of deception currently smothering the "retail" trading market ... if you're ready to have the blinkers removed and see how to make a *real* money in currency exchange ...

Stay with me for the next 3 minutes and I'll explain to you why today is your lucky day.

Why I'm The Real Deal...

Ok, wanna know the major difference between me and all these other *experts* out there?

I'm an actual trader.

That's right ... I live it as well as talk about it.

I walk the walk.

Beware of dirty tricks in the Forex trading scene.

These lying bastards may know a little bit about Forex ... they just took a couple courses, maybe had a private consult with a real Forex professional, and push it on you like it's the second coming.

Or worse ... they run seminars and webinars with the same old pitch to talk you into laying out your hard-earned cash for their "Signal Service".

Pffft! I've had it with this bullsh*t. I'm the real deal. I traded for a living until I discovered a way to trade from home and absolutely *coin it* on a daily basis.

More of that in a second ...

For now, be assured ... I know what I'm talking about ... and although no one *really* knows which way the economy is going right now -- these are volatile times in foreign exchange -- if you arm yourself with the right tactics ... you can win **BIG**.

1500 pips in one week!

That's the end result of my trading last week ... now I'm not promising you'll have the same *jaw-dropping success* after my coaching. The vast majority of my students find it takes commitment to achieve this kind of *Forex Trading success*.

But if you absorb the material I've put in this course – you'll soon see Forex as the *fastest and easiest* way to your dreams ...

Even if you're a rank beginner.

I've been on the *inside* learning the systems used by the titanic banking corporations the world over. The system that *delivers trillions* around the markets each day.

The systems I personally use and which you're about to get your hands on.

With the economy looking like a bad horror flick, time is more precious than ever before -- *you need someone who will deliver the goods* ...

You need something real that makes you money today, tomorrow, and *for the rest of your life* ...

Here's Some Proof!

“On EUR/USD I made 138 pips, on GBP/USD I made 142 pips, and GPB/JPY I made 104 pips. Works like magic. Tom, you are the real guy. Thanks again”. ~ Philip U.

“Ok ... So What’s In It For Me?”

The only way to do this is to get your information from someone who has been there and succeeded already.

The difference here is real, from-the-front-line training ... using "proprietary systems" that until now only the banking glitterati had access to.

Did you read that right?

The exact same systems I used to command billions of dollars daily while working for a top bank can now be yours to use, from home, on the currency exchange market.

When I left my extremely comfortable job at the bank I decided to build wealth for myself.

I now make a great living trading from home and once you've got the system down you can work from anywhere.

The difference with my system is real hands-on training, not some bullsh*t theory but what actually works in the trenches.

You need a straight-shooter you can trust, someone who has talked the talk and walked the walk.

Forex has been *really* good to me, to the tune of **millions over the last few years**, and I'll show you *exactly how I did it* -- step-by-step, right down to the smallest details.

Closely Guarded Secrets From 20+ Years As A Top Forex Bank Trader...

Hi, my name is Tom “Strignano” Alongi.

At the age of 28 I was the youngest Chief Trader ever at a top Italian bank, so it's safe to say that I know a thing or two about Forex trading.

I was entrusted by the world banking elite to manage millions upon millions of dollars. They came to me to guard the bank's money and -- as happened one time -- I

could go for a piss break and lose a fortune.

But ... these very same systems are now about to become incredible power in your hands.

Think about this ... if you're trading against the might of gigantic corporations, I mean ... *what chance do you think you really have?*

They've spent millions developing systems that mean they win every single time.

However ...

What if you got hold of these closely guarded systems and used them for yourself?

Think you'd stand a better chance?

And what if you had *proven, step-by-step, can't fail*, golden insights into the market from a Forex veteran holding you by the hand until you too are playing the markets for fun and banking obnoxious amounts of cash?

From Joe Tavella (Trader at Societe Generale Bank)

“I've personally known Tom for many years and traded under his tutelage, he is one of the smartest guys I know in the market. He's developed tons of winning systems that he's taught me and now I can't believe he's going to hand them over to you.

To tell you the truth, I know he's going to get some serious backlash from fellow traders for revealing some of these super secret systems that the major banks are using privately to dominate the Forex market.

This guide can take any newcomer off the street and turn them into a seasoned pro making serious cash pulling trades in no time.”

Maybe This Sounds Familiar...?

You're sick and tired of trying to establish your retirement fund with lousy-paying 401K's and CD's and other bullsh*t investment funds that'll never yield enough to

pay your golf fees ... let alone enough to pay for the grandkids college fund ...

You want to **make a lot of money** while working when you want and where you want (skiing in Aspen, lying on the beach in the Bahamas, sitting at a sidewalk cafe in Paris -- in fact, you can do this from literally *anyplace in the world* that has an Internet connection) ...

You're ready to take back your time, your family, your sanity, and your peace of mind -- in fact, total control of your life, to live as you see fit, not as some Pension Fund manager or government bureaucrat thinks you should ...

So, here's the deal ...

The market isn't going to play nice with an *amateur*.

In order to grab the cash you need to know what's really going on -- the secret code behind *every single Forex trade* ...

In A Single Word, I'll Tell You The One Thing That Controls The Market Over Everything Else..."

Psychology.

In the real world, the markets go up and down based on human emotions and reactions.

It's basic psychology -- and *that's* why just techniques and signals will never be able to make you rich.

Fact is -- you *won't* win every trade. Losses are unavoidable. ***But it's how you react to the losses that make the difference.***

That's where a golden set of rules comes in ... Instead of getting rattled you just stick to your system.

And once you take ownership of these rules -- and if you stick to them you'll become so rich you'll be able to employ your Bank Manager as your assistant.

But you gotta stick to the rules -- promise me that. See ...

Most traders act like *gamblers at the roulette table* -- they keep betting more and more hoping they can turn it around.

What happens?

They end up losing *everything* 99 times out of 100.

The key is to let the other guys be ruled by their emotions ... **with my systems you'll build on your wins and cut your losses short.**

The most sophisticated computer can't predict the anarchy and chaos of the market. If you don't have a set of rules and stick to them you're going to crash ...

"If You Don't Follow A Proven Plan, The Market Will Chew You Up ... And Spit You Out!"

Every other new Forex trader has to pay dearly for his early mistakes out of his own pocket -- a "tuition fee" for learning the ropes.

But if you follow my proven insider system, you're getting a scholarship. You skip the apprenticeship and get right to the money-making part.

From Mark C (Full Time Trader)

"This is an amazing course written by someone who actually knows what he is talking about.

He has lived the life of a professional trader and understands the practical aspects of trading, both emotional and financial. **The course is a fountain of information, delivered in a rapid fire style.**

It tackles an in depth subject with both humor and great competence. It delivers memorable examples, excellent instruction, and clear and concise explanations.

Whether you are a complete novice or a full time trader you will come away from this course with an appreciation of Tom's

experience and knowledge.

If you want to be a better trader...then get this course!"

The Most Expensive Rookie Trader Mistakes ...

Not cutting their losses -- making things worse by holding on to losing positions

Trading on their emotions and gut feelings instead of sticking to their rules

Overtrading and exposing your winnings to unacceptable risk (this is the most common blunder for new traders)

"This Information Almost Didn't See The Light Of Day"

It's a near miracle you're even getting hold of this knowledge.

After all, I cut a lot of ties and burned all bridges in getting this out into the public domain (*which is why only a few will ever get their hands on this course, more of that in a moment ...*)

See, I was a member of a highly secretive group who kept all their cards close to their chest.

I mean ... they didn't want the little guy getting hold of their money-siphoning techniques; they wanted to keep it all to themselves like the fat kid in a sweet shop.

And these guys are some of the greediest, savviest sharks you'll ever meet, they're predators.

Anyone caught revealing their system would be fed to the lions and frankly... that's why they don't talk to me anymore, but hey ... ***I'm over it ...***

Stop Swimming With The Sharks ...

The stress was too much for me working in a corporate environment, it was dog-eat-dog ... I had to escape (you read the papers lately about what's going on with Wall Street?).

Using the system I learnt on the job I left the fat cats behind and took my future into my own hands. Honestly, I couldn't stomach the sleaze and money-grabbing greed of the Big Bank crooks.

Now working from home I only have to worry about myself -- and the money ... well I've never seen anything like it.

You get to a point where you don't even have to think about whether you can afford something, a point where you can create money literally at will.

I'm handing these plans over to you, you're about to uncover the very same secret techniques I use every day to live a luxurious lifestyle.

I'm a real trader; it's how I make my living so I can soon tell if a Forex system is going to work.

I've reviewed Tom's training and it did not take me long to establish that it's going to be **great for any trader from the novice to the more experienced professional.**

Tom takes you through everything, step by step, from the basics to several trading methods including one of Tom Strignano's very own methods. It shows you what to do and more importantly what NOT to do when trading Forex.

"Wicked Secrets That Will Ignite Your Hidden Greed Gland ..."

There's nothing quite like the rush you get from spotting a market trend and cashing in on it.

But you have to know what you're doing.

Trading is like legal crack -- you get this incredible rush and it's addictive. If you don't stay in control, you'll trade like a maniac until all your money is gone. I've seen it happen again and again.

My plan was forged in the searing furnace of the European Forex market. I had to make a whopping 8 times my salary in trading profits each year, or I would be just another bum on the street looking for a new job (although New York is not a bad place to be a street bum- until the temperature drops to 30 below).

I also had 15 other traders working below me, and their losses counted as my losses. I'm telling you I tested *everything* we did, and only kept doing the things that made us money. (And I kept these killer tactics under lock and key.)

"The Deadly Error Every Forex Rookie Makes (And How To Avoid It) ..."

Don't trade on your emotions.

Your biggest trading enemy is you. It's not what the market is doing, or the economy, or the other traders, or world events.

You see, without a plan you're taking *dumb risks* and before you know it, you're strangling your profits.

Most traders are more careful with their shopping. If you're spending \$1,000 on new golf clubs, you'll compare prices and brands and try out different sets before buying.

Yet the same guy will blow \$1,000 on a trade based only on a flimsy "hunch."

Without a proven plan, you're trading on your emotions. You're *hypnotized* by the constant movements of the market, and make trades based on "feelings."

The problem is most market movements are meaningless. You have to look at the big picture. You ***always want to be one step ahead***. You have to become a genius forecaster.

That's why a proven plan is *essential* if you want to make good money and make it consistently.

Cold, hard facts:

The market doesn't give a damn about you.

It's big and impersonal and runs by its own rules. You don't tell the market what to do, and there's "*nobody out to get you!*"...

If you try and force trades based on what *you* think should happen, you'll be in for a very rude slap in the ass.

You trade according to what's actually going on, not what you *think* you see or what you *wish* you see.

And you do that by following the steps in my plan. These closely-held secret trading strategies have worked for me to the tune of millions each year.

Do the same things I did and you'll *change your life forever* ...

The Golden Ratio and The Golden Mean -- I live and die by these ratios and you will too ...

Why you must never, ever think about the money (*it sounds odd but failure to ignore the cash could mean you pull the trigger too late*).

How to become one with the market (sounds a little woo-woo doesn't it?) ... go with the flow or be crushed!

Discover how past prices will reveal future price activity. How drawing a simple (read: critical) line on a chart forces you to listen to what the Market is telling you (and don't allow your trading to get hijacked by the latest news story – like the rest of the newbs).

The little known Fibonacci technique that'll make you money day in and day out ...

How to _____ an _____ that'll skyrocket your profits in Forex time, and time again – even when it seems you're on a losing streak.

A magic little bit of arithmetic that'll give you clues to what's going on with all the major currencies (even if you flunked math).

A system that makes the difference between great trading performance ... and crappy performance. This module alone will set you far above most Professional Bank Traders.

Master it in a weekend. That's why I developed "Forex Immersion". It's all there -- step-by-step and easy to understand.

I test my theories very carefully and throw out the ones that don't make me money. I ignore the noise and concentrate on the gold nuggets -- the stuff that's proven to bring in the big bucks.

And that's what you get in "Forex Immersion". But you won't start making money until you act.

"Why should you listen to me?"

Look, I've cracked the code. I learned everything there was to know about Forex from the old-timers and took it to a whole new frontier.

I hauled in record-breaking profits when I worked for the biggest European banks, and now I use that experience to make an impressive living from home, working just a few hours a week. (Time to hang out with my little girls, now that's what I'm talking about.)

It's still the Wild, Wild West out there -- nobody can predict what's going to happen, especially in these doom-laden economic times.

The only way to survive the vicious Forex jungle is to follow the rules in my course.

But you have to remember the golden rules ...

Leave your ego at the door and ignore your emotions.

You can be "right" or you can make money -- simple as that. I got rich by not caring if I was "right."

I could get away with charging an arm and a leg for this ... I mean, where else are you going to get such a quick and easy way to make a fantastic living?

And more than that ... **you won't see a closely guarded system of this type anywhere else.**

"Forex Immersion" is much more than a course ... it's a total key to your liberation.

You're getting a solid, proven step-by-step system *that sets you up* for the rest of your life.

I spent 20 years of my life working my ass off in banks to learn everything there is to know about Forex. *And that's not counting the additional \$100,000 for private trading seminars and workshops on the evenings and weekends.*

But you can quickly and easily go from complete newbie to making an income that turns Forex veterans green with envy ...

"Can You Really Make A Decent Living Just Trading Forex?"

YES ... a solid income is very possible if you follow my plan and stick to it.

Forex Immersion is an easy to follow blueprint. I've distilled the system down to a simple method so there's no room for error.

You don't need to be a math whiz or a computer geek. You already have what it takes ... **You just need to take action ...**

"Ok, So What Is The Price?"

Traders will pay top dollar to get hold of this information.

It's worth millions to them. Seriously ... if people are making thousands of dollars every hour and success and failure are poised on a knife edge ...

How much would you pay to have the insider knowledge so it becomes impossible for you to lose?

You're going to find out how to move with the flow of the markets.

You won't be focused on the money you're making when you trade ... the big money comes as a by-product of this fail-safe system.

I know bankers who would sell their own mothers to get their greedy mitts on this formula.

But I'm not going to ask for any of your relatives. You *will* have to pay though. You have no idea of the blood, sweat and tears it took to get this out to you.

However, you won't have to pay my original and very fair price of ~~\$1997~~.

I decided at that price only the fat cats who I hate would be able to afford the course.

After all ... you've not joined the elite yet, not until you finish this report.

So I settled on ~~\$997~~ for total access to my millionaire-making inner sanctum. And yet ...

Something made me uneasy at that price, I decided to change tack, **flatten the price but up the exclusivity.**

You can grab this all now - while the banking elite aren't watching - for only ~~\$697~~ (read on until the end for an extra surprise) ... but there's a catch.

I had to come up with a way to make my system retain its value while at the same time get it in the hands of the very people I want to help. You'll see how I've done that towards the end of this letter...

I understand you may still be skeptical so I've removed any risk ...
